Rounding Change

Because Australia no longer has 1 or 2 cent coins the way we used to, we have had to come up with a system of rounding prices to the closest five cents when paying with cash. There are the Rounding Rules you need to know when looking at the ones place.

Take a look at the prices below, draw either an up or down arrow in the box indicating whether the price need to be rounded up or down, and then write the new price in the blank. The first one is done for you as an example.
