

# Trading

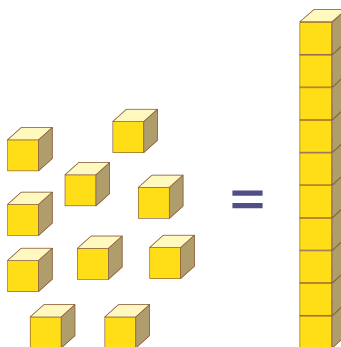

Trading is changing a quantity into smaller or bigger parts without changing its value.

Trading is mostly taught using special wooden blocks to help children to develop a visual understanding of how trading in a system based on multiples of 10 works. These blocks are given names to show their value.

-  1 short = one (1)
-  1 long = 1 ten (10)
-  1 flat = 1 hundred (100)
-  1 block = 1 thousand (1000)

10 shorts  
make  
one long

10 ones  
make  
one ten

10 longs  
make  
one flat

10 tens  
make  
one  
hundred
